Top tips for terrific teeth

Top tips

- ✓ Brush teeth twice a day for two minutes using the right fluoride toothpaste.
- ✓ Brush last thing at night just before bed and at one other time of the day.
- ✓ Brush all surfaces of your teeth.
- ✓ Spit out the toothpaste and avoid rinsing with water so that some fluoride from the paste is left on your teeth and will make them stronger.
- ✓ Cut down on how often you have sugary foods and drinks.

Choose snacks and drinks which are kinder to teeth such as:

- cheese
- crackers or breadsticks
- fresh fruit and vegetables
- water
- milk

If you have any concerns about your teeth see your dentist.

Visit the dentist regularly. Every six months or as often as recommended. To find your local dentist call **0300 311 22 33** or visit www.nh.s.uk

Do not put a child to bed with milk or juice as this can lead to serious tooth decay. Choose water.

Choosing the right toothbrush

Use a toothbrush with medium bristles and a small head.
Get a new toothbrush every three months.

Using the right amount of toothpaste

Children aged 0 to 3 should use a smear of toothpaste

Children aged 3 to 6 should use a pea sized amount

Adults should also use a pea sized amount of toothpaste

How much fluoride?

- **Children aged 0 to 3** should use toothpaste containing no less than 1000ppm of fluoride.
- **Children aged 3 to 6** should use toothpaste containing more than 1000ppm of fluoride.
- **Children aged 6** and over and **adults** should use family fluoride paste containing 1350-1500ppm of fluoride.

Tips for encouraging children to brush

- ◇ Children need help with brushing until they are at least seven years old.
- ◇ Get a fun toothbrush that your child looks forward to using.
- ◇ Try a reward system such as a toothbrushing chart.
- ◇ Be a good role model—show your child that you brush your teeth.
- ◇ Use an app, sing or play music to make the two minutes fly by.

Mouthwash

Use mouthwash at a different time of day to brushing, unless advised otherwise by your dentist.
