Parents Engagement

Initiative	Analysis	Benefits
Seasaw - The online learning platform **Ongoing from Jan 2021**	Two sources of date for analysis are used: • Recurring report of platform usage by pupils • Parents questionnaires Seasaw platform was instrumental in delivering remote learning during lockdowns. Usage increased during the first national lockdown by 66% and further increased during the second national lockdown by 154%. All children and parents can use either Seasaw or home learning packs for remote education. Over 70% of children are using Seasaw. Children who do not use Seasaw use other remote educational means due to special requirements. 100% of parents who used Seasaw were either very satisfied or satisfied with teacher's feedback.	SeeSaw has proven to be extremely effective online learning platform for remote learning. Seasaw has been extensively used during lockdowns and after. The platform allows families and teachers to communicate about pupil's personalised tasks, learning progress and efficiently provide feedback. Parents, children and teachers use the platform extensively as evident by thousands of posts made through the platform monthly. Following positive parent's feedback, we planned further training on Seasaw online usage and manuals. Manuals and training material are available on the school website. School ICT lead James A provides ongoing one to one support for parents via e-mail.
Forums on Safeguarding and E-safety **Ongoing from 2019**	E-Safety is an important program of keeping the students safe in ever changing online world. The initial feedback on training workshop was extremely positive with 100% rating it as fantastic or great (95% fantastic, 5% great).	Safeguarding and e-safety policies are regularly updated and discussed with parents. Latest safeguarding policy and team presentation for 2021-2022 are available on school website. E-safety program started in 2019 and is ongoing to keep the students safe. We constantly refresh and add training materials as online world changes. Various e-safety presentations and settings are available on school website. Following very positive initial feedback, we planned further training on e-safety in Autumn 2022.
Future parental support courses and groups. Ongoing	100% of parents attending first toilet training workshop in April, 2022 described it as 'extremely useful' and majority asked for follow up training and drop-in sessions with NHS professionals. Furthermore, during parents evenings parents asked for other training workshops which were incorporated in school training plan. Please see below in the Annex 1.	Termly drop-in sessions allows parents to discuss with NHS professional, teacher or other parents individual challenges and receive personalise advice. It has proved extremely popular as evident by 100% positive feedback and majory asking for follow up sessions. The school arranged termly drop-in sessions with NHS professional for 2022-2023 Academic year. In addition school runs a wide program workshops suggested by parents during parents evenings listed in Annex 1.

Annex 1.

Date	Time	Parents workshop
